🌐 Web Development Internship – Task 3

📌 Task Description

In Task-2, you built a **Personal Portfolio Website** with About, Projects, and Contact sections. That was your first hosted website.
Now, we will **add interactivity using JavaScript**.

You will implement:

- A **dynamic navigation bar** (that changes style on scroll).
- A **contact form with JavaScript validation**.
- A simple **dark mode toggle** (bonus feature).

This project will introduce you to the **Document Object Model (DOM)** in JavaScript and how to manipulate HTML dynamically.

What You'll Build (Requirements)

1. **Dynamic Navbar**
   - Change background color when scrolling.
   - Highlight active menu item.
2. **Contact Form Validation**
   - Ensure fields are not empty.
   - Check valid email format.
   - Show inline error messages.
3. **Dark Mode Toggle (Optional)**
   - Add a button to switch between light/dark themes.
   - Save preference in **LocalStorage**.

Deliverable

A **portfolio website with interactive features**:

- Responsive navbar
- Validated contact form
- Dark mode (bonus)

Why This Task Is Important

- Teaches you **JavaScript DOM manipulation**.
- Adds **real-world features** found in modern websites.
- Helps you write **clean, user-friendly UI interactions**.

Sample Starter Code

Navbar Scroll Effect (JS)

```js
window.addEventListener("scroll", function() {
  let navbar = document.querySelector("nav");
  navbar.classList.toggle("scrolled", window.scrollY > 50);
});
```

CSS for Navbar Change

```css
nav {
  transition: background 0.3s;
}
nav.scrolled {
  background: #222;
  color: #fff;
}
```

Form Validation (JS)

```js
document.getElementById("contactForm").addEventListener("submit", function(e)
  e.preventDefault();

  let email = document.getElementById("email").value;
  if (!email.includes("@")) {
    alert("Please enter a valid email!");
    return;
  }
  alert("Form submitted successfully!");
});
```

Dark Mode Toggle (JS)

```js
function toggleDarkMode() {
  document.body.classList.toggle("dark-mode");
  localStorage.setItem("dark", document.body.classList.contains("dark-mode"));
}
window.onload = () => {
  if(localStorage.getItem("dark") === "true") {
    document.body.classList.add("dark-mode");
  }
};
```
